

The Recruiting Factory Process

With the hundreds of schools out there it can be difficult to be seen by coaches from top programs. We have created a pipeline through holding a higher understanding of what collegiate coaches are looking for in their athletes and we pride ourselves in delivering your athletic potential from our factory in an online player profile.

All players are different and we want to ensure that we offer a package that compliments that individual. Once you have expressed an interest to have a recruiting profile created and have chosen the package fit for you we will book a shoot. For time management purposes you will be filmed with other athletes of your gender. We stand by our professional production level and we are committed to providing you the best video and online recruiting services to convey to college coaches your volleyball potential and athleticism.

Unfortunately we can't be held responsible for how you perform in your filming. We will do our best to calm your nervous, allow practice runs, do extra takes and make sure you are ready to focus on delivering a mistake free demo video. The fact of the matter is, this is a skills video and coaches expect for you to make mistakes. It's very difficult to play mistake free volleyball and you will always be your toughest critic. The Recruiting Factory is not shooting and editing a skills highlight video. We are shooting to showcase your abilities and volleyball talents to college coaches across the country. The Recruiting Factory understands what it takes to get you to the next level because we have walked in your shoes. Your recruiting online player profile will showcase your individualism and leave no doubt in the coaches mind about your athletic skills, potential, desire or your passion for volleyball. The goal of your online player profile is to get that coach to come watch you perform live at tournament or single match.

Payment

The day of the shoot please provide your player profile information from the Word document that was emailed to you, and include a check for the amount of the video package you wish to have done. This check can be made payable to: Kevin Miller At the time of payment please include a CD with your digital profile picture. If purchasing one of the higher packages please include your .mov file of game footage. Please write on the disk your first and last name, jersey number and position.

The Filming

1. You will arrive to the facility of your shoot and be given instruction through email about directions and when you should arrive.
2. Please make sure you look presentable as you will be doing a player introduction on camera for the college coaches.
3. Make sure to bring all relevant information pertaining to the video package you have chosen. (Digital picture & game video)
4. The Video Director will do a dry run through with the athletes prior to filming. Athletes will have the opportunity to practice their on camera player introductions and be given instruction of their specific position based drills.
5. We will continue filming all athletes at their respectable positions while following a very specific based video script based on game position, camera angles, and lighting.

Post Production

It takes a total of 2-4 weeks for us to digitize, edit and post your player profile. We will email you a link to your online profile. Please make sure everything is correct. You must final approve the online profile after we send it to you. Once you give final approval if you request additional changes it will be an additional cost of \$25.00 per copy change and \$50.00 for any video changes. Once filmed all sales are final and there are no refunds. We do not guarantee athletic scholarships nor are we affiliated with the NCAA.

Online Profile Package - \$275.00

You will pick up to three skills you can have filmed and uploaded on your online player profile to be viewed by coaches you send your link to. If you want to add additional skills beyond three the cost will be \$50.00 per skill selection. You must make this final selection 5 days prior to the video shoot so we can finalize the skills shooting script before the day of the shoot. The skill categories are as follows and will be customized based on player's given position.

- Attacking
- Blocking
- Serving
- Passing
- Setting
- Defense

Each athlete will get 20 minutes of game film uploaded to their profile. You must send us on DVD that is a .mov file. It is very important to send us the .mov file and not an actual movie DVD of the player's game file. If you are unable to provide us with the proper format we can convert the format you have for an additional cost of \$50.00 with your approval. If you would like to put additional game footage beyond the included 20 minutes on the athlete's online profile the cost is \$50.00 per 20 minutes of footage. We will not further edit game film you give us. If you would like your game footage edited further it will be 25.00 per hour.

Video Shoot Location:

New Uno Volleyball Club Facility

781 S. Larkin Ave.

Joliet, IL 60436
